

# HEATED HOSE SERIES

## Heated Hose Systems for:

- ▶ Corrosion Protection
- ▶ Professional Painters
- ▶ Industry
- ▶ Woodworking

## Definite Advantages

- ▶ heating of material reduces viscosity of paint drastically
  - = vastly improved coating-results, even at edges
  - = little or no solvent need be added to paint
  - = reduced overspray
- ▶ suitable for solvent and water-based materials
- ▶ suitable for some 2-component materials
- ▶ suitable for electrostatic-coating-equipment
- ▶ Teflon-coated hoses (inside) = no clogging of material
- ▶ Cleaning of system (time + solvent) is reduced by appr. 80%
- ▶ no need for separate paint-heater
- ▶ heated-hose-system reduces the need for larger airless-units which means less investment, less expenses
